

# SIMPSONS MALT

The home of good malt

**PRODUCT RANGE**

Founded in 1862, Simpsons Malt is a fifth-generation, family-owned business and Certified B Corporation. We have a passion for making high-quality, sustainable malts that are renowned for their exceptional taste, flavour and consistency.

This drive for quality begins with the barley we use. We only use varieties that have been industry approved for malting and, through our agricultural merchandising division McCreath Simpson & Prentice (MSP), we contract our required annual malting barley tonnage directly with trusted growers and deliver it into grain stores we own post-harvest.

As well as heritage base malts such as Golden Promise and Maris Otter, we're also proud to be one of a few UK maltsters that produces its crystal and roasted malts in-house. This takes place in the state-of-the-art Roast House at our Tivetshall Maltings, where members of our dedicated team take great pride in producing malts that help brewers to craft the finest beers.

Approximate specifications are listed below.  
Quoted figures are indicative only and may be adjusted to suit customers' needs

| Product                                 | EBC 450g (°EBC) | Moisture Max | Characteristics  |
|---|-----------------|--------------|--|
| <b>BASE MALTS</b>                       |                 |              |  |
| Finest Pale Ale <b>Golden Promise</b> ™ | 4.4-6.6         | 3.7%         | Heritage malt chosen for its taste, diversity and processability.  |
| Low Colour <b>Golden Promise</b> ™      | <3.9            | 5.0%         | All the GP goodness but for brewers who require a lower colour     |
| Finest Pale Ale <b>Maris Otter</b>      | 4.4-6.6         | 3.7%         | Heritage malt with a rich, malty flavour and reliable performance. |
| Low Colour <b>Maris Otter</b>           | <3.9            | 5.0%         | Lower colour version of Maris Otter for those who require it.      |
| Best Pale Ale Malt                      | 4.4-6.6         | 3.7%         | Versatile base malt produced from UK, two-row barley.              |
| Extra Pale Ale Malt                     | <3.9            | 5.0%         | Light base for lagers and ales produced from UK, two-row barley.   |
| Finest Lager Malt                       | <3.9            | 5.0%         | Superb low colour lager malt with a clean, light malty taste.      |

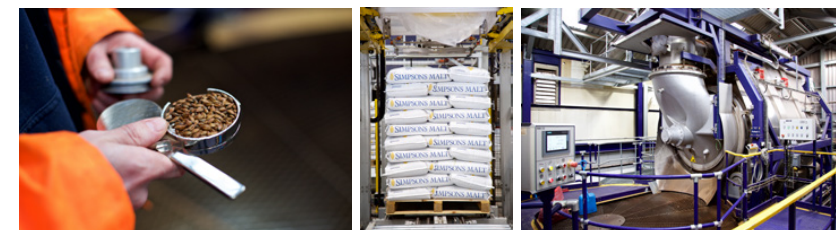

| Product                       | EBC 450g (°EBC) | Moisture Max | Characteristics  |
|-------------------------------|-----------------|--------------|--|
| <b>HIGHLY KILNED MALTS</b>    |                 |              |  |
| Vienna Malt                   | 5.5-11          | 3.5%         | Enhances the colour, flavour and aroma of all light beers.           |
| Munich Malt                   | 20-28           | 4.0%         | Brings rich malty flavours and golden hues to light beers.           |
| Imperial Malt                 | 44-55           | 5.0%         | Full-bodied flavour and biscuit aroma with warm brown notes.         |
| Aromatic Malt                 | 55-77           | 5.0%         | Intense malty and raisin notes and gives beautiful brown colour.     |
| <b>NEW</b> Dark Aromatic Malt | 143-165         | 5.0%         | Richly malty, bready, dried fruit notes with subtle sweetness.       |
| <b>CRYSTAL MALTS</b>          |                 |              |  |
| <b>NEW</b> CaraGlow           | 11-22           | 7.0%         | A delicately sweet and clean Cara that enhances body and colour.     |
| Caramalt                      | 33-46           | 7.0%         | Enhances almost any beer style that needs a little sweetness.        |
| Premium English Caramalt      | 59-73           | 7.0%         | Top of the range Cara that imparts a delicious, sweet malty flavour. |
| Crystal Light                 | 105-124         | 6.0%         | Brings mild caramel and toffee flavours to beers and a golden hue.   |
| <b>Crystal T50</b> ™          | 139-154         | 5.0%         | Tight spec crystal with each batch targeting 50L colour (130 °EBC).  |
| Crystal Medium                | 184-209         | 5.0%         | Gives deeper caramel notes and stunning golden and red hues.         |
| Heritage Crystal              | 184-209         | 5.0%         | A Crystal Medium spec malt made with heritage Maris Otter barley.    |
| Crystal Dark Medium           | 204-242         | 5.0%         | A combination of sweetness and roasty notes, giving a dark red hue.  |
| Crystal Dark                  | 275-314         | 5.0%         | Flavours of toffee and burnt sugar without roast malt astringency.   |
| <b>Simpsons DRC</b> ®         | 308-352         | 5.0%         | Roasted twice, DRC boasts dried fruit flavours and a red-brown hue.  |
| Crystal Extra Dark            | 495-550         | 5.0%         | Dried fruit and burnt sugar flavours. Use in small amounts (<10%).   |

|                                   |           |      |   |
|-----------------------------------|-----------|------|---|
| <b>ROASTED MALTS</b>              |           |      |   |
| Amber Malt                        | 59-78     | 2.5% | A versatile biscuity, roasted malt imparting a lovely brown hue.  |
| <b>NEW</b> Export Pale Brown Malt | 105-132   | 3.5% | Toasty, nutty, lighter-bodied malt with subtle cocoa and biscuit. |
| Brown Malt                        | 440-559   | 4.0% | Brings a rich coffee aroma that is ideal for stouts and porters.  |
| Pale Chocolate Malt               | 583-732   | 3.5% | Lightly roasted with subtle notes of coffee, cocoa and chocolate. |
| Chocolate Malt                    | 1174-1430 | 3.0% | Chocolate tones and coffee hints bring richness and complexity.   |
| Black Malt                        | 1576-2090 | 3.0% | Darkens beer. Surprisingly neutral flavour with a clean dryness.  |
| Roasted Barley                    | 1430-2090 | 3.0% | Intense roasted coffee flavours that bestow a deep, dark colour.  |

|                                 |         |      |  |
|---------------------------------|---------|------|--|
| <b>SPECIAL MALTS</b>            |         |      |  |
| Wheat Malt                      | <6.6    | 4.5% | Used as wheat beer base or in small amounts to boost foam stability.   |
| Malted Oats                     | <4.4    | 7.0% | Thick, husked oat malt brings silky smoothness and body to beers.      |
| Malted Rye                      | <6.6    | 7.0% | Contributes a spicy rye note and provides fullness and mouthfeel.      |
| Golden Naked Oats™ <b>GNO</b> ™ | 13-26   | 7.0% | Delicious, huskless oat crystal that delivers a subtle, nutty flavour. |
| Red Rye Crystal                 | 261-341 | 4.0% | Offers a ruby red hue and a well-rounded, sweet, malty flavour.        |
| Dextrin Malt                    | <3.9    | 7.0% | Sparingly used to add foam stability; balances hop-forward IPAs.       |
| <b>NEW</b> Chit Malt            | <3.9    | 7.0% | High protein, improves head retention and boosts body without colour.  |

|                          |      |       |  |
|--------------------------|------|-------|--|
| <b>UNMALTED ADJUNCTS</b> |      |       |  |
| Flaked Barley            | <3.2 | 13.0% | Adds body, grainy dryness and provides excellent head retention.     |
| Flaked Wheat             | <3.2 | 12.5% | Boosts body and foam stability with grainy notes and smooth texture. |
| Torrefied Wheat          | <3.9 | 12.0% | Enhances head retention, body and foam stability.                    |
| Flaked Oats              | <3.2 | 12.5% | Adds silky mouthfeel and creamy body with nutty, smooth flavour.     |
